Purpose

- Provide an overview of Procurement Modernization and insights on experience with Public Works and Government Services Canada's Change Management Process, Tools and Templates.

Modernizing Procurement: a GC priority...

“Fixing procurement will be a top priority. Simpler and streamlined processes will make it easier for businesses to provide products and services to the government and will deliver better results for Canadians.”

Speech from the Throne, November 2008

“Small and medium-sized businesses are the engines of the Canadian economy... To support them, our Government will continue to identify and remove unnecessary, job-killing regulation and barriers to growth... Recognizing the strategic importance of a strong domestic shipbuilding industry, it will continue to support the industry’s sustainable development through a long-term approach to federal procurement. ”

Speech from the Throne, March 2010

... addressing stakeholders feedback...

Departments' views

Departments seeking flexibility / better balance with respect to risk

Processes are too complex, long and expensive

Would like more e-tools / easy-to-use / self-serve

Suppliers' views

Hard to do business with Government of Canada

Processes too complex / bureaucratic

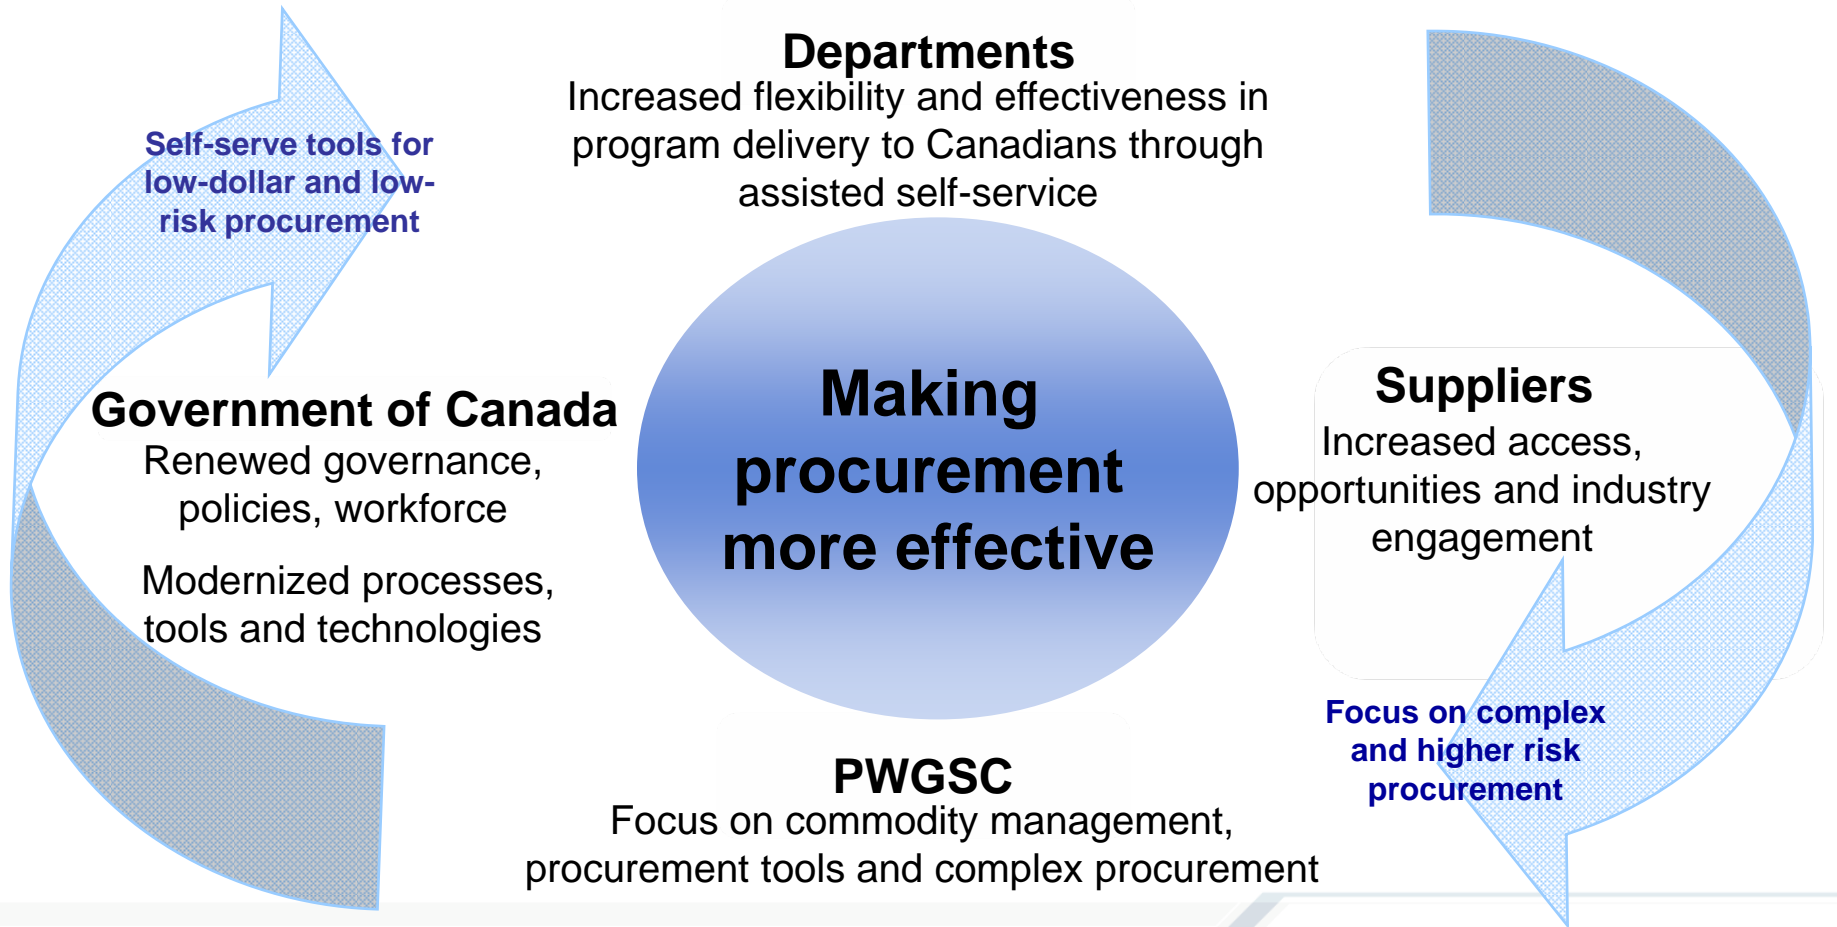

Perceived unfairness/ restricted access

Government is too risk averse

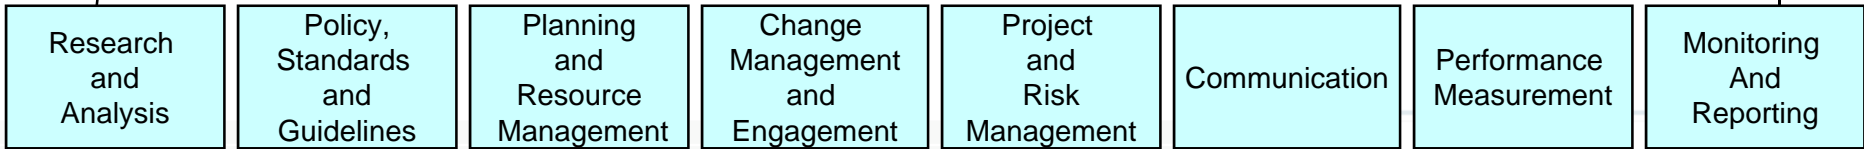

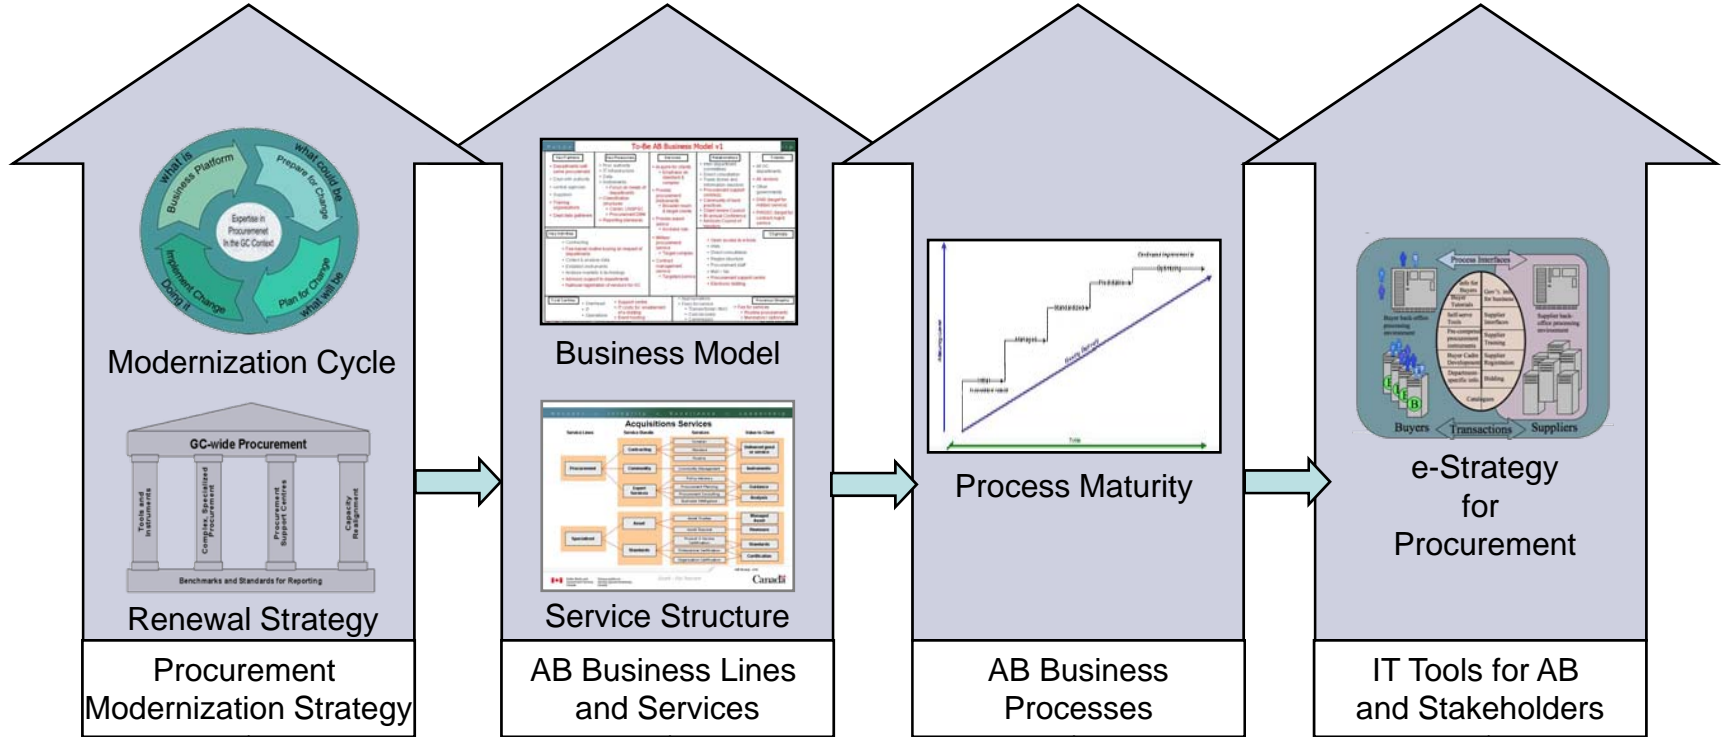

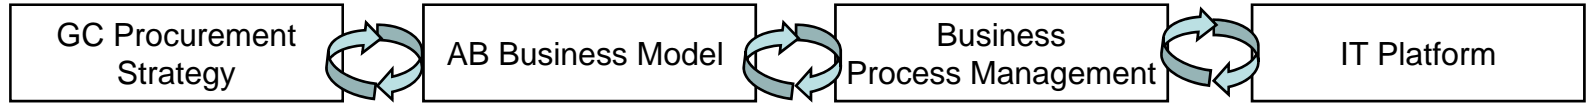

Opportunities to modernize procurement and improve day-to-day operations

... with a **vision** to make it easier...

... using an integrated strategy...

... and strong change management techniques
